

## PRESS RELEASE

### Antoine Dumurgier appointed CEO of the Sogelink Group

Joins from Berger-Levrault to lead product transformation and accelerate organic growth

*Lyon, August 28, 2025* – Sogelink, a European leader in software for the digitalization of infrastructure construction, is embarking on a new chapter with the appointment of Antoine Dumurgier as CEO.

This management transition follows the 2023 investment in the company by CVC Capital Partners, joining existing shareholder Keensight Capital, with the goal of supporting the Company as it expands and accelerates its international development to consolidate its European leadership.

Sogelink's comprehensive product suite enables more sustainable, smarter, and safer construction processes by offering software solutions tailored to the infrastructure sector. For twenty-five years, its solutions have supported the digitalization of the construction value chain. The Company now has more than 700 employees in six countries, serving over 18,000 leading customers and 220,000 users.

Antoine Dumurgier has extensive experience in software transformation, international management, and innovation leadership. After a successful career at NASA and McKinsey, Antoine spent fourteen years with the Edenred group, including eight on the Executive Committee, where he led cross-border teams and executed multiple acquisitions. Before joining Sogelink, Antoine was most recently the CEO of Berger-Levrault, a software business operating in seven countries with revenues of over €200 million, where he led the SaaS transformation, invested in AI-powered functionality, and grew their international presence.

He succeeds Fatima Berral, who, for twelve years, including seven as CEO, has driven strong organic growth and led strategic acquisitions that have expanded the Group's offering and strengthened its European footprint. Fatima Berral will now chair the Strategic Committee, a new governance body designed to support the overall Group strategy.

*"I am proud of how far we have come together and confident in Antoine's ability to work alongside the teams to take the group's ambitions to new heights. As Sogelink enters this new chapter, I am handing over the reins in a spirit of continuity and with the desire to continue serving the Group through my role on the Strategic Committee,"* said Fatima Berral.

Antoine Dumurgier added, *"I'm tremendously excited about the opportunity to join Sogelink. In addition to continuing the Company's strong organic growth trajectory, my immediate focus is on accelerating product innovation through recent advances in AI capabilities, and I look forward to improving the daily experience of the group's more than 220,000 users. I am very honored to be part of this new chapter in the Company's history and look forward to continuing its international expansion to make Sogelink the undisputed European leader in its fields."*

#### About Sogelink

Sogelink is a provider of cloud-based and mobile software solutions that has driven the digital transformation of the construction sector for over twenty-five years. Its mission is to simplify construction for everyone, everywhere. Sogelink offers a comprehensive range of solutions to stakeholders across the value chain, including engineering firms, land surveyors, civil contractors, utilities, local governments, and housing providers — delivering innovation in digital workflows, building data, and urban information modeling. The Group supports the full project lifecycle, from design to operations, through digital twin technology. As a European leader in Construction Tech, Sogelink continues to expand internationally, serving 18,000 clients and 220,000 users today.
